Demand balances with domestic hanks (except reciprocal balances and halances with private banks and American branches of foreign banks), plus casb items in process of collection.

Reserves actually required are based on deposits at opening of business. The figures in this column, therefore, represent the reserves required to be maintained on the business day following the call date. The requirements as to reserves to be maintained by each member hank are as follows: Time deposits—5 percent for all member banks; net demand deposits—19 percent for central Reserve city hanks, 17 percent for Reserve city banks and 11 percent for country banks.

The figures shown in this column are the differences between reserve balances reported by member banks on the call date and the reserves required to be maintained on the first business day following the call date. They are, therefore, merely approximations of the reserve position of member banks.

The cash in vault and reserve with approved national banking associations.

The member bank in Alaska and 1 member bank in the Virgin Islands of the United States.
